

PARTICIPANTS NEEDED FOR RESEARCH IN MENTAL HEALTH

We are looking for volunteers to take part in a study of perceptions of mental health messages. Volunteers should be students whose age is below 26. Individuals who have been diagnosed and/or treated for a mental health condition are not eligible to participate. A mental health condition is defined as a wide range of mental and emotional problems that could affect one's ability to perform these functions including depression, stress, feelings of isolation, and anxiety.

If you are interested and agree to participate you would be asked to: read an information sheet containing mental health information or watch videos of personal mental health stories.

Your participation would involve one session,
which will be about 60 minutes long.

In appreciation for your time, you will receive a \$5 gift card.

For more information about this study, or to volunteer for this study,
please contact:
